Message from the Guest Editor

Dear Colleagues,

The purpose of this Special Issue is to highlight the state-of-the-art in applications of information theory to the fields of machine learning and data science. Possible topics include, but are not limited to, the following:

- Fundamental information-theoretic limits of machine learning algorithms
- Information-directed sampling and optimization
- Statistical estimation, optimization, and learning under information constraints
- Information bottleneck methods
- Information-theoretic approaches to adaptive data analysis
- Information-theoretic approaches to feature design and selection
- Estimation of information-theoretic functionals

Special Issue

entropy

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Kevin H. Knuth

Department of Physics, University
at Albany, 1400 Washington
Avenue, Albany, NY 12222, USA

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [PubMed](#), [PMC](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
