## Causal Relativistic Hydrodynamics for Viscous Fluids

Guest Editor:

**Prof. Dr. Esteban Calzetta**

Facultad de Ciencias Exactas y Naturales, Departamento de Física, Universidad de Buenos Aires, Buenos Aires C1428EGA, Argentina

Deadline for manuscript submissions:

**closed (1 October 2023)**

### Message from the Guest Editor

Stimulated by the application of relativistic heavy ion collisions and new theoretical developments, such as the derivation of hydrodynamics from holography, the field of relativistic real fluids has seen unprecedented activity in later years. We now have a consistent framework where relativistic viscous hydrodynamics is regarded as a low-energy effective theory enforcing relevant conservation laws, as well as the Second Law of Thermodynamics. Moreover, the solutions to this effective theory act as an attractor to the evolution of the system regarding less coarse-grained descriptions.

The aim of this Special Issue is to offer a platform for the leaders in the field in recent years, for newcomers, and for people whose main interest lies not in relativistic hydrodynamics, but in fields where relativistic hydro is likely to make major contributions, to exchange views on the present state of the art, the main challenges confronting us, and the new applications ready to be explored.

## Editor-in-Chief

### Prof. Dr. Kevin H. Knuth

Department of Physics, University  
at Albany, 1400 Washington  
Avenue, Albany, NY 12222, USA

## Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

*Entropy* is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [PubMed](#), [PMC](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
