

Special Issue

Entropy Application in Biomechanics and Biosignal Processing

Message from the Guest Editor

The main objective of this Special Issue will be to reunite studies that focus on investigating entropy application in biomechanics and for other biosignals, as well as its methodological concerns, in several conditions and populations, in both healthy individuals and those with a pathology. In addition, this Special Issue aims to present studies that verify clinical evidence of the effectiveness of the use of entropy to discriminate or classify different populations/conditions. Specific themes for this Special Issue include, but are not limited to:

- Entropy and biomechanics
- Entropy and movement variability
- Entropy in gait and balance
- Entropy and heart rate variability
- Entropy and muscle function
- Entropy and brain rhythms
- Entropy as a biomarker
- Multiscale entropy and complexity
- Entropy and its algorithms
- Methodological concerns when extracting entropy

Guest Editor

Prof. Dr. Marcus Fraga Vieira

Bioengineering and Biomechanics Laboratory, Federal University of Goiás, Goiânia 74690-900, Brazil

About the Journal

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Editor-in-Chief

Prof. Dr. Kevin H. Knuth

Department of Physics, University at Albany, 1400 Washington Avenue,
Albany, NY 12222, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
