# **Special Issue**

# Synchronization in Time-Evolving Complex Networks II

# Message from the Guest Editor

The aim of this Special Issue is to follow the success of the first Special Issue. With this second volume, we continue to present original and recent developments on synchronization in time-evolving complex networks. This is currently a hot research topic due to its potential in a variety of emerging applications. The subjects may include, but are not limited to, the following areas: synchronization in evolving ecological, neural, mobile agents, communication, adaptive, and switching networks; synchronization in evolving engineering networks and their applications; synchronization based on pinning control strategies; and preserving synchronization performance when parts of the individual systems or links are destroyed.

# About the Journal

# Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

*Entropy* is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

## Editor-in-Chief

Prof. Dr. Kevin H. Knuth

Department of Physics, University at Albany, 1400 Washington Avenue, Albany, NY 12222, USA

## **Author Benefits**

## **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

## Journal Rank:

JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
