

## Special Issue

# LDPC Codes for Communication Systems

### Message from the Guest Editors

This Special Issue (SI) aims to present cutting-edge research on LDPC codes and their applications in contemporary and future communication systems. Of special interest are papers exploring:

- Machine learning approaches for LDPC code construction and decoding;
- Hardware-efficient implementations for 5G/6G applications;
- Short-block-length LDPC codes for IoT and machine-type communications;
- Rate-compatible LDPC codes for adaptive transmission;
- Joint design of LDPC codes with modern modulation schemes;
- Novel protograph-based constructions;
- Quantum LDPC codes and their applications;
- Energy-efficient decoding algorithms and architectures.

## About the Journal

### Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

*Entropy* is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

---

### Editor-in-Chief

Prof. Dr. Kevin H. Knuth

Department of Physics, University at Albany, 1400 Washington Avenue,  
Albany, NY 12222, USA

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
