

Special Issue

Application of Information-Theoretic Concepts in Bio-, Environmental and Engineering Science Research

Message from the Guest Editor

The aim of this Special Issue is to encourage interested researchers in engineering science disciplines, industrial engineering, as well as in bio-, geo-, and environmental sciences to present original and recent developments on interfacing information-theoretic concepts with:

- model selection and data analysis;
- prediction and design methods;
- reliability, safety, and risk analysis;

in their research work. We particularly welcome novel applications of these concepts for:

- designing water, energy, and telecommunication networks;
- statistical process control in industrial manufacturing;
- predicting natural hazards and climate change processes;
- signal processing in biological networks;
- remote sensing in agriculture and forestry.

Guest Editor

About the Journal

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Editor-in-Chief

Prof. Dr. Kevin H. Knuth

Department of Physics, University at Albany, 1400 Washington Avenue,
Albany, NY 12222, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
