Special Issue

Entropy and Complexity in Quantum Dynamics

Message from the Guest Editor

The goal of this Special Issue is to present the latest advances at the intersection of quantum physics and quantum information, with a focus on the dynamic behavior of quantum systems. Theoretical and experimental developments probing thermalization and chaos in quantum systems, many-body localization, quantum error correction, information propagation through unitary quantum networks, as well as information-theoretic implications of blackhole dynamics, are within the scope of this issue.

About the Journal

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Editor-in-Chief

Prof. Dr. Kevin H. Knuth

Department of Physics, University at Albany, 1400 Washington Avenue, Albany, NY 12222, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
