

Special Issue

Entropy in Machine Learning Applications, 2nd Edition

Message from the Guest Editor

This Special Issue will include, but not be limited to, applications using machine learning methods, including the construction and application of managed pressure drilling knowledge graphs with extended cross-entropy loss, the computational characterization of undifferentially expressed genes with altered transcription regulations, entropy-weighted water quality prediction methods based on long short-term memory and data correlation analysis, convolutional networks that use cross-entropy as the loss function based on transfer learning for rice disease detection, and the semantic disambiguation of advertising vocabulary based on knowledge graphs.

About the Journal

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Editor-in-Chief

Prof. Dr. Kevin H. Knuth

Department of Physics, University at Albany, 1400 Washington Avenue,
Albany, NY 12222, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
