Special Issue

Information Theory and Complexity Science Approaches to Health Conditions and Cognitive Decline

Message from the Guest Editors

This Special Issue aims to disseminate the latest findings in the investigation and characterisation of health conditions and cognitive decline, using information theory and nonlinear complexity science approaches. We welcome manuscripts presenting novel findings that promise to revolutionise the health and cognitive sciences, in addition to those introducing novel algorithms to quantify the degree of a health-related condition through the assessment of the structural complexity of pathological signals. In particular, we encourage submissions on data acquired from wearable devices, such as 'hearables', which are very convenient for the user, but record typically weaker signals, with an overall signal quality that is compromised (due to artefacts or noise).

Guest Editors

About the Journal

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Editor-in-Chief

Prof. Dr. Kevin H. Knuth
Department of Physics, University at Albany, 1400 Washington Avenue, Albany, NY 12222, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
