

Special Issue

Selected Feature Papers from 7th International Conference on Computer and Communications (ICCC)

Message from the Guest Editors

The International Conference on Computer and Communications (ICCC) was established in 2015. It is organized by the Sichuan Institute of Electronics, sponsored by IEEE, and supported by Southwest Jiaotong University, Sichuan University, etc. It is held in Chengdu annually, where more than 500 attendees from 12 countries all around the world take part. ICCC 2021 will be held in Chengdu, China once again on 10–13 December 2021. On behalf of the Organizing Committee, we warmly invite computer and communications scientists, engineers or technicians, graduate students, and all those simply interested in the technique to take part in this unique and innovative conference with your enthusiasm to develop and your willingness to mature computer and communications techniques and their applications. We encourage authors who present an article at the 2021 IEEE 7th International Conference on Computer and Communications (ICCC) and who feel that their contribution is within the scope of interest of the journal *Entropy* to submit an original and essential extension of the ICCC paper to be considered for publication.

About the Journal

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Editor-in-Chief
