

Special Issue

Information Theoretic Security and Privacy of Information Systems

Message from the Guest Editors

All these challenges call for an interdisciplinary approach where cryptographers, privacy engineers, and data scientists need to collaborate in order to address the theoretical, engineering, and business needs, where robust data curation mechanisms, encompassing techniques such as user-centric security ceremonies, privacy-preserving, and cryptographic techniques, have to come together to provide a multilayered approach.

Guest Editors

Dr. David Arroyo

About the Journal

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Editor-in-Chief

Prof. Dr. Kevin H. Knuth

Department of Physics, University at Albany, 1400 Washington Avenue,
Albany, NY 12222, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
