Selected Papers from 15th Joint European Thermodynamics Conference

Message from the Guest Editors

Dear Colleague, The JETC conferences were established in 1989 under the name “Journées Européennes de Thermodynamique Contemporaine”, by ECAST, the European Center for Advanced Studies in Thermodynamics. As it was desirable to enlarge the scope of the conferences, and in order to unite thermodynamics across Europe, the conferences changed its name in 2007 to the “Joint European Thermodynamics Conference”, while the acronym remained the same. The scope of the conference is rather broad, and covers the methods and concepts of equilibrium and non-equilibrium thermodynamics in all branches of physics, engineering, sciences, and humanities.

Guest Editors

Prof. Dr. Miguel Rubi

Dr. F. Xavier Alvarez

Dr. Daniel Campos

About the Journal

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Editor-in-Chief

Prof. Dr. Kevin H. Knuth

Department of Physics, University at Albany, 1400 Washington Avenue,
