Special Issue

Stochastic Thermodynamics of Microscopic Systems

Message from the Guest Editors

Stochastic thermodynamics deals with small systems, interacting with heat, work, or particle reservoirs, and under external manipulation. The stochastic characteristic of thermodynamics led to new phenomena, such as the existence of fluctuation theorems, for heat and work, which govern non-equilibrium physics. One of its consequences is the apparent violation of the second law, or of Landauer's principle. Since the equilibrium state is the state with the least information on it, for systems described by stochastic thermodynamics, there is very significant quantity of information. This Special Issue aims to be a channel for recent research on mesoscopic systems, such that their interactions can be well modelled by stochastic thermodynamics. It also aims to present special systems on the frontier of biology and physics, such as nano-machines and driven enzymes, and mesoscopic manipulated systems.

About the Journal

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Editor-in-Chief

Prof. Dr. Kevin H. Knuth
Department of Physics, University at Albany, 1400 Washington Avenue, Albany, NY 12222, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
