

Special Issue

Multuser Information Theory III

Message from the Guest Editors

The previous Special Issues on “Multuser Information Theory” in the last three years have led to the publication of several high-quality papers on new research directions in information theory. These Special Issues received a lot of attention from the research community. In 2020, we will continue this trend with a new Special Issue on “Multuser Information Theory III”. Possible topics include, but are not limited to, the following:

- Multi-letter coding techniques
- Information theory and computing
- Network coding and index coding
- Applications of information theory in probability theory and statistics
- Applications of information theory in quantum physics

Guest Editors

Prof. Dr. S. Sandeep Pradhan

Dr. Ayfer Ozgur

Dr. Xiugang Wu

About the Journal

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Editor-in-Chief

Prof. Dr. Kevin H. Knuth

Department of Physics, University at Albany, 1400 Washington Avenue,
Albany, NY 12222, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
