Special Issue

Thermodynamic Optimization of Energy Systems

Message from the Guest Editor

This Special Issue on *Thermodynamic Optimization of Energy Systems* explores advanced methods for the design, optimization, and sustainability of energy systems in response to global energy and environmental challenges. Key topics include multi-objective optimization techniques, exergy and pinch analysis, life cycle assessment, and computational modeling for enhancing the efficiency of thermodynamic processes. Research covers biofuel production, hydrogen technology, and the integration of renewables, focusing on energy transitions in agricultural and industrial sectors. Emphasis is placed on innovative thermodynamic cycles, the optimization of energy conversion processes, emission reduction strategies, and resource management, offering critical insights for sustainable energy system design and operation.

About the Journal

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Editor-in-Chief

Prof. Dr. Kevin H. Knuth
Department of Physics, University at Albany, 1400 Washington Avenue, Albany, NY 12222, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
