

## Special Issue

# Entropy in Computational Linguistics

### Message from the Guest Editor

The goals of this Special Issue is to gather together papers that deal with the reduction or elimination of the waste generated in text management, open new opportunities in this special field of computational linguistics, find further objective measures that clearly present the problems with which we are faced, and offer solutions to overcome these issues. The topics are but not limited to:

- digital texts
- word processors
- end-users
- measuring the entropy of digital texts
- digital sustainability
- effectiveness
- efficiency
- digital education
- lean computing

## About the Journal

### Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

*Entropy* is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

---

### Editor-in-Chief

Prof. Dr. Kevin H. Knuth

Department of Physics, University at Albany, 1400 Washington Avenue,  
Albany, NY 12222, USA

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
