Special Issue

The Random Walk Path of Pál Révész in Probability

Message from the Guest Editors

In this volume we seek to gather together the papers of Pál Révész's coworkers, friends, and colleagues to commemorate his life and his everlasting impact on probability theory. Submissions from people working on random walk topics, who feel that their research was influenced by the work of Pál Révész, are also welcome.

Guest Editors

Prof. Dr. Antónia Földes

Department of Mathematics, College of Staten Island, The City University of New York, New York, NY 10314, USA

Prof. Dr. Endre Csáki

Department of Probability Theory, Alfréd Rényi Institute of Mathematics, 1364 Budapest, Hungary

About the Journal

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Editor-in-Chief

Prof. Dr. Kevin H. Knuth
Department of Physics, University at Albany, 1400 Washington Avenue, Albany, NY 12222, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
