

Special Issue

Information-Theoretic Approaches to Atoms-in- Molecules

Message from the Guest Editor

This Issue will focus on methods that employ information theory in the largest sense in the context of atomic and molecular science. All classical and quantum information theoretic aspects are welcome. Examples of areas that will be included in this Special Issue will include but will not be limited to the use of Shannon's information theoretic techniques in quantum chemistry; in crystallography; and in the informational treatment of nucleic acids sequences and amino acids sequences in proteins and in mathematical chemistry, in addition to quantum information and quantum computing.

Guest Editor

Prof. Dr. Chérif F. Matta

About the Journal

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Editor-in-Chief

Prof. Dr. Kevin H. Knuth

Department of Physics, University at Albany, 1400 Washington Avenue,
Albany, NY 12222, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
