

Special Issue

Information-Processing and Embodied, Embedded, Enactive Cognition. Morphological Computing and Evolution of Cognition. Part 3

Message from the Guest Editors

For this special issue, we invite contributions bringing new insights into the topics of:

- Embodied, Embedded and Enactive cognition
- Morphological computing, theories, and frameworks
- Physical dynamics as computational resource
- Reservoir computing with Liquid or Echo State Machines
- Evolutionary aspects of cognition
- Minimal/basal cognition and evolution
- Modeling cognitive architectures and processes
- Neuromorphological computing
- Evolutionary robotics and evolutionary computation and embodied systems
- Developmental systems, computational processes, and embodiment
- Morphological and evolutionary aspects of affective, cognitive, and social interaction
- Cognition and new evolutionary synthesis

Comparative research on the differences between various of natural systems and natural and artificial systems, and the role played by different morphologies (sensory and motor) or reservoirs in cognitive computation.

Guest Editors

Dr. Gordana Dodig-Crnkovic

Dr. Marcin Miłkowski

Dr. Przemysław Nowakowski

About the Journal

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Editor-in-Chief

Prof. Dr. Kevin H. Knuth

Department of Physics, University at Albany, 1400 Washington Avenue,
Albany, NY 12222, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
