Special Issue

Statistical Mechanics of Complex and Disordered Systems

Message from the Guest Editors

The aim of this Special Issue is to encourage researchers to present original and recent developments on complex (quasi necessarily disordered) systems, grounded on theory and algorithms, in connection with the entropy concept, bearing in mind not only experimental or empirical features are of interest.

Guest Editors

Prof. Dr. Marcel Ausloos

1. School of Business,University of Leicester, Brookfield, Leicester LE2 1RQ, UK
2. Department of Statistics and Econometrics, Bucharest University of Economic Studies, 010374 Bucharest, Romania

Prof. Dr. Janusz Miskiewicz

1. Institute of Theoretical Physics, University of Wrocław, Wrocław, Poland
2. Physics and Biophysics Department, Wrocław University of Enviromental and Life Sciences, Wrocław, Poland

About the Journal

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Editor-in-Chief

Prof. Dr. Kevin H. Knuth
Department of Physics, University at Albany, 1400 Washington Avenue, Albany, NY 12222, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
