Special Issue

Entropy Transformations in Nonequilibrium and Other Complex Systems

Message from the Guest Editor

This Issue will accept unpublished original papers, short communications, and appropriate reviews that pertain (but are not restricted) to the following research areas:

- Development of the theoretical apparatus of entropy and its application for complex systems.
- Nonequilibrium processes and flows in different media.
- Comparison of the use of thermodynamic and kinetic approaches for entropy transformations.
- Dissipative structures and extremes of entropy generation.
- Methods for the description of nonequilibrium processes in biological systems.
- Complexity and transformation of information in genetics.
- Statistical modeling in complex neural networks.
- Entropy and information in many-particle systems.
- Transition between order and disorder including entropy and information transforms.

About the Journal

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Editor-in-Chief

Prof. Dr. Kevin H. Knuth

Department of Physics, University at Albany, 1400 Washington Avenue, Albany, NY 12222, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
