# **Special Issue**

## Information Theory for Control, Games, and Decision Problems

### Message from the Guest Editors

Originally, Shannon's information theory was developed deriving fundamental bounds on the rate of communication, regardless of the application; thus, semantic aspects of communication were not considered. Since optimality is not guaranteed for separating processing for communication and application, more and more fundamental bounds have been derived for specific applications. In particular, fundamental results have been obtained in the last few years for problems in distributed control and decision theory. This Special Issue should take up this development and provide space for original works dealing with cross-disciplinary problems, where information theory is used for (distributed) control problems or decision problems, which may also include problems regarding operational research.

Guest Editors Prof. Dr. Tobias Oechtering

Dr. Maël Le Treust

Prof. Dr. Serdar Yuksel

## About the Journal

### Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

*Entropy* is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

#### Editor-in-Chief

Prof. Dr. Kevin H. Knuth

Department of Physics, University at Albany, 1400 Washington Avenue, Albany, NY 12222, USA

#### **Author Benefits**

#### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
