

Special Issue

Information Theory and Network Coding II

Message from the Guest Editors

This Special Issue aims to be a forum for the presentation of innovative network coding theories and technologies for various emerging networking systems. In addition to communications, topics about network coding for computation, distributed storage, caching, security and message integrity are also welcome.

Guest Editors

Dr. Shenghao Yang

School of Science and Engineering, The Chinese University of Hong Kong, Shenzhen 518172, China

Dr. Kenneth Shum

About the Journal

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Editor-in-Chief

Prof. Dr. Kevin H. Knuth

Department of Physics, University at Albany, 1400 Washington Avenue,
Albany, NY 12222, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
