

Special Issue

Multiusuer Information Theory

Message from the Guest Editor

The purpose of this Special Issue is to develop new fundamental and analytical approaches to efficient, reliable and robust transmission of information in multiuser systems. The research work coming out of this special issue contributes toward solving some of the fundamental problems in the mathematical discipline of Multiuser Information Theory. Possible topics include, but are not limited to, the following:

- New analytical techniques
- non-asymptotic characterizations
- duality between source networks and channel networks
- networks with large number of nodes
- new models of communication and new applications

Guest Editor

Prof. Dr. S. Sandeep Pradhan

About the Journal

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Editor-in-Chief

Prof. Dr. Kevin H. Knuth

Department of Physics, University at Albany, 1400 Washington Avenue,
Albany, NY 12222, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
