

Special Issue

Information Security and Privacy: From IoT to IoV

Message from the Guest Editors

This Special Issue focuses on the key areas of privacy, resilience, trust, entropy and mutual information. Key areas include:

- Privacy-respecting systems.
- Trust, privacy and resilience with smart cities.
- Citizen identity and rights in digital governance.
- Hardware-based security.
- Artificial intelligence (AI) safety and security.
- Lightweight encryption.
- Cyber documents and CTI reports.

Keywords:

- cryptography
- blockchain
- hardware-based security
- artificial intelligence, computer vision
- chaos
- image encryption
- cyber threat intelligence
- information theory
- entropy

Guest Editors

Prof. Dr. Bill William Buchanan

Dr. Arslan Munir

Dr. Jawad Ahmad

About the Journal

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Editor-in-Chief

Prof. Dr. Kevin H. Knuth

Department of Physics, University at Albany, 1400 Washington Avenue,
Albany, NY 12222, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
