

Special Issue

Applications of Information Theory in the Geosciences II

Message from the Guest Editor

Information Theory is creating many new applications in broad areas of science, particularly the in the domain of Complex Adaptive Systems. These new applications often blend theoretical developments of Information Theory with innovative applications to complex-systems problems in the geosciences. This Special Issue specifically emphasizes research that addresses geoscience problems using Information Theory approaches, by introducing a novel development of Information Theory for specific applications, and/or by solving a new geoscience problem using the tools of Information Theory. Submissions focused on software tools and datasets, or on topics at the boundaries of Information Theory, the geosciences, and other disciplines are also welcome

Guest Editor

Prof. Dr. Benjamin L. Ruddell
School of Informatics, Computing, and Cyber Systems, Northern Arizona University, Flagstaff, AZ, USA

About the Journal

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Editor-in-Chief

Prof. Dr. Kevin H. Knuth

Department of Physics, University at Albany, 1400 Washington Avenue,
Albany, NY 12222, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Physics, Multidisciplinary) / CiteScore - Q1 (Mathematical Physics)
