

Dear Colleagues,

On behalf of the Evaluation Committee, we are pleased to announce the winner of the **2017 *Environments* Travel Award**. This has been granted to:

Dr. Liesbeth Weijs, a postdoctoral researcher at the *University of Queensland*, Australia. Her work is focused on the development of coupled models (PBTK/TD) for marine mammals in order to provide some fundamental components from which a comprehensive management and conservation strategy can be developed. Her research trajectory points towards providing PBTK/TD models as tools that can be used to reasonably connect exposure and effect in marine mammals. This is the crucial connection that is needed to assess risks in marine mammals across all life stages.

Prof. Dr. Yu-Pin Lin
Editor-in-Chief

2017 TRAVEL AWARD WINNER

Environments (ISSN 2076-3298) is an international, open access journal of environmental sciences published quarterly online by MDPI. The award consisted of **800 Swiss Francs**, to attend an academic conference of the winner's choice in 2017. We would like to thank all the applicants for submitting their diverse and fascinating range of research topics.
