Message from the Guest Editors

Dear Colleagues,

Land-use changes are discussed not only in relation to climate change, but also to political and socio-economic changes. Such interactions between humans and environments are receiving more attention in today's society. Because of its complexity, land science involves broad communities. This Special Issue is seeking original, unpublished papers that describe recent advances and efforts in various land-use and land-cover-change issues in relation to changing environments, not only from a GLP (Global Land Project) community standpoint but also from that of non-GLP communities. This Special Issue invites research papers addressing the state of the art in developing the concepts and tools for an effective analysis at different scales. Research results and discussions, especially those targeting contributions to exploring the research framework with co-design and co-production for Future Earth (<http://www.futureearth.org/>), are highly welcome. Papers selected for this Special Issue are subjected to a rigorous peer review procedure with the aim of rapid and wide dissemination of research results, developments, and applications in the area of environments.

Message from the Editor-in-Chief

Environmental issues are quickly becoming central political, economic and academic topics of the twenty-first century. A large number of modern challenges are directly or indirectly caused by complex interactions between environmental issues. Such issues require interdisciplinary research, knowledge and insights to understand and, ultimately, for solutions to be found. Through the journal *Environments*, we strive to create a platform for meaningful discourse by accepting contributions from a wide range of fields. We sincerely hope you will consider publishing your distinguished work in this highly-accessible, peer-reviewed journal.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [PubAg](#), [AGRIS](#), [GeoRef](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
