Deadline for manuscript  
submissions:

**closed (28 December 2021)**

### Message from the Guest Editor

Aside from the well-known threats of plastic pollution, like any other submerged substrata, marine litter provides a habitat for organisms that are able to settle and persist on artificial surfaces. Once colonized, plastic surfaces act as steppingstones for the connectivity between populations and the recruiting of larvae, as well as disrupting ecological processes in benthic and pelagic communities. As a Guest Editor, I would like to kindly invite you to contribute a research article or a review to be published in a Special Issue of *Environments* (ISSN 2076-3298): 'The Plastic Pollution Paradox: marine litter as new habitat'. The general purpose of this Special Issue is to discuss the ecological relevance of biological positive interactions with marine litter. The scope is broad, and I invite submissions based on detailed investigation, both from field and laboratory, aiming to reveal the drivers and to account for ecological possible consequences of plastic colonization on planktonic and benthic communities.

## Message from the Editor-in-Chief

Environmental issues are quickly becoming central political, economic and academic topics of the twenty-first century. A large number of modern challenges are directly or indirectly caused by complex interactions between environmental issues. Such issues require interdisciplinary research, knowledge and insights to understand and, ultimately, for solutions to be found. Through the journal *Environments*, we strive to create a platform for meaningful discourse by accepting contributions from a wide range of fields. We sincerely hope you will consider publishing your distinguished work in this highly-accessible, peer-reviewed journal.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, ESCI (Web of Science), PubAg, AGRIS, GeoRef,** and **other databases.**

**Journal Rank:** JCR - Q2 (*Environmental Sciences*) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
