Message from the Guest Editors

Wastewater-based epidemiology (WBE), or environmental surveillance, has been used to better understand disease transmission. Much of the current research is dedicated to studying the potential for the wastewater surveillance of SARS-CoV-2 RNA to serve as an early diagnostic tool to identify new outbreaks and/or changes in the transmission of COVID-19 in a community. However, wastewater surveillance has also been used in the past to provide early warnings of infectious disease outbreaks. In the context of the ongoing COVID-19 pandemic, critical questions remain regarding the effect of spatial and temporal environmental factors on the relationship between viral RNA concentrations in wastewater and COVID-19 transmission in a community. We are inviting papers for this Special Issue that explore the utility of wastewater surveillance for detecting pathogens at a community or near source scale to better understand infectious disease transmission, as well as the use of WBE data to protect public health; papers describing method development for the quantification of pathogens in wastewater matrices are also welcome.

Message from the Editor-in-Chief

Environmental issues are quickly becoming central political, economic and academic topics of the twenty-first century. A large number of modern challenges are directly or indirectly caused by complex interactions between environmental issues. Such issues require interdisciplinary research, knowledge and insights to understand and, ultimately, for solutions to be found. Through the journal *Environments*, we strive to create a platform for meaningful discourse by accepting contributions from a wide range of fields. We sincerely hope you will consider publishing your distinguished work in this highly-accessible, peer-reviewed journal.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **ESCI (Web of Science)**, **PubAg**, **AGRIS**, **GeoRef**, and **other databases**.

Journal Rank: CiteScore - Q1 (*Ecology, Evolution, Behavior and Systematics*)
