Deadline for manuscript
submissions:

closed (4 October 2019)

Message from the Guest Editors

The field of wildlife toxicology continues to evolve with more emphasis on emerging contaminants as we continue to learn more about the sensitivity and effects on certain species of wildlife that are exposed to environmental contaminants. This special issue will address emerging environmental contaminants in wildlife toxicology and will consider a variety of species in different parts of the world as related to impacts of contaminants. As we continue to learn more about the effects of environmental contaminants on various species in wildlife around the world, the issue of emerging environmental contaminants will continue to challenge scientists to better understand the role of such contamination to wildlife health and biodiversity.

Message from the Editor-in-Chief

Environmental issues are quickly becoming central political, economic and academic topics of the twenty-first century. A large number of modern challenges are directly or indirectly caused by complex interactions between environmental issues. Such issues require interdisciplinary research, knowledge and insights to understand and, ultimately, for solutions to be found. Through the journal *Environments*, we strive to create a platform for meaningful discourse by accepting contributions from a wide range of fields. We sincerely hope you will consider publishing your distinguished work in this highly-accessible, peer-reviewed journal.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [PubAg](#), [AGRIS](#), [GeoRef](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
