

Special Issue

Land Use Change in the Changing Environment II

Message from the Guest Editors

Land-use changes are discussed not only in relation to climate change, but also to political and socio-economic changes. Such interactions between humans and environments are receiving more attention in today's society. Because of its complexity, land science involves broad communities. This Special Issue is seeking original, unpublished papers that describe recent advances and efforts in various land-use and land-cover-change issues in relation to changing environments, not only from a GLP (Global Land Project) community standpoint but also from that of non-GLP communities. This Special Issue invites research papers addressing the state of the art in developing the concepts and tools for an effective analysis at different scales. Research results and discussions, especially those targeting contributions to exploring the research framework with co-design and co-production for Future Earth (<http://www.futureearth.org/>), are highly welcome. Papers selected for this Special Issue are subjected to a rigorous peer review procedure with the aim of rapid and wide dissemination of research results, developments, and applications in the area of environments.

About the Journal

Message from the Editor-in-Chief

Environmental issues are quickly becoming central political, economic and academic topics of the twenty-first century. A large number of modern challenges are directly or indirectly caused by complex interactions between environmental issues. Such issues require interdisciplinary research, knowledge and insights to understand and, ultimately, for solutions to be found. Through the journal *Environments*, we strive to create a platform for meaningful discourse by accepting contributions from a wide range of fields. We sincerely hope you will consider publishing your distinguished work in this highly-accessible, peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Sergio Ulgiati

1. Department of Science and Technology, Parthenope University of Naples, Centro Direzionale, Isola C4, 80143 Napoli, Italy

2. School of Environment, State Key Joint Laboratory of Environment Simulation and Pollution Control, Beijing Normal University, No. 19 Xijiekouwai Street, Beijing 100875, China

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubAg, AGRIS, GeoRef, and other databases.

Journal Rank:

JCR - Q2 (Environmental Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
