# Special Issue

# Advanced Nanomaterials for Wastewater Treatment

### Message from the Guest Editors

In recent years, nanomaterials have been the subject of research and development, successfully applied in many fields, such as catalysis, medicine, electronics and biology. Some of the properties of nanomaterials are due to the huge increase in surface area when going from a powder material to a nanoparticle material. The increase in surface area leads to an increase in the effectiveness of the reactions that can occur on them. In particular, the application of nanomaterials in wastewater treatment has attracted wide attention. Due to their small size, and therefore large specific surface areas, nanomaterials have strong adsorption and reactivity capabilities. Furthermore, the mobility of nanomaterials in solution is extremely high. The advent of nanomaterials offers numerous opportunities for the removal of heavy metals, microorganisms and organic pollutants from wastewater. This Special Issue invites submissions of original research contributions and reviews regarding recent advances in the development, production and characterization of nanomaterials, as well as their use in new fields of application.

### Guest Editors

Dr. Pierantonio de Luca

Dipartimento di Ingegneria Meccanica, Energetica e Gestionale, Università della Calabria, I-87036 Arcavacata di Rende, CS, Italy

Prof. Dr. Pedro E. Arce

Department of Chemical Engineering, Tennessee Technological University, Cookeville, TN, USA

### Deadline for manuscript submissions

closed (20 December 2024)

# About the Journal

## Message from the Editor-in-Chief

Environmental issues are quickly becoming central political, economic and academic topics of the twenty-first century. A large number of modern challenges are directly or indirectly caused by complex interactions between environmental issues. Such issues require interdisciplinary research, knowledge and insights to understand and, ultimately, for solutions to be found. Through the journal Environments, we strive to create a platform for meaningful discourse by accepting contributions from a wide range of fields. We sincerely hope you will consider publishing your distinguished work in this highly-accessible, peer-reviewed journal.

## Editor-in-Chief

Prof. Dr. Sergio Ulgiati
1. Department of Science and Technology, Parthenope University of Naples, Centro Direzionale, Isola C4, 80143 Napoli, Italy
2. School of Environment, State Key Joint Laboratory of Environment Simulation and Pollution Control, Beijing Normal University, No. 19 Xinjiekouwai Street, Beijing 100875, China

## Author Benefits

**High Visibility:**

indexed within Scopus, ESCI (Web of Science), PubAg, AGRIS, GeoRef, and other databases.

**Journal Rank:**

JCR - Q2 (Environmental Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)

**Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2025).
