

## Special Issue

# Adaptation Measures for Urban Heat Island

### Message from the Guest Editor

Mitigation measures, such as green roof, cool roof (high reflectance material), water retentive material, etc., have been developed with an expectation that they will serve as countermeasure effects of urban heat island. In recent years, adaptation measures, such as awning, louver, directional reflective material, mist, evaporative material, etc., are being developed with the expectation that they will serve as a countermeasure effect of outdoor human thermal environments, under the influence of a urban heat island. Focusing on the recently-developed technologies mentioned above, research papers on the development status, evaluation method and results of those technologies, as well as spread strategy in society, etc. are expected in this Special Issue. Of course studies on the phenomenon and mitigation measures of the urban heat islands are also welcomed.

### Guest Editor

Dr. Hideki Takebayashi

Department of Architecture, Graduate school of Engineering, Kobe University 1-1 Rokkodai, Nada, Kobe 657-8501, Japan

### Deadline for manuscript submissions

closed (31 May 2019)

## About the Journal

### Message from the Editor-in-Chief

Environmental issues are quickly becoming central political, economic and academic topics of the twenty-first century. A large number of modern challenges are directly or indirectly caused by complex interactions between environmental issues. Such issues require interdisciplinary research, knowledge and insights to understand and, ultimately, for solutions to be found. Through the journal *Environments*, we strive to create a platform for meaningful discourse by accepting contributions from a wide range of fields. We sincerely hope you will consider publishing your distinguished work in this highly-accessible, peer-reviewed journal.

### Author Benefits

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), PubAg, AGRIS, GeoRef, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2025).
