

## Special Issue

# Greenhouse Gas Emission Reduction and Green Energy Utilization, 2nd Edition

### Message from the Guest Editors

Currently, energy utilization is linked to various economic activities and environmental challenges, such as global climate change, air pollution, forest destruction, ozone depletion, acid precipitation, greenhouse gasses (GHGs), water and land use, wildlife loss, and radioactive emissions. In order to reach a promising and brighter energy future while mitigating environmental burdens, these challenges need to be addressed together. For this purpose, we should turn our thinking toward green energy utilization, which could reduce the associated environmental, economic, and social issues. Therefore, we kindly invite contributions addressing different current topics related to green energy utilization and their impact on GHGs and energy use, as well as emission impacts, alternative and green fuel applications, emission control strategies, and comparative assessments of energy use and energy consumption from a policy perspective. The publications in the first edition, which we believe may be of interest to you, can be found here: [https://www.mdpi.com/journal/environments/special\\_issues/B7BN5Q27A5](https://www.mdpi.com/journal/environments/special_issues/B7BN5Q27A5).

### Guest Editors

Dr. Syu-Ruei Jhang

Department of Safety, Health and Environmental Engineering, National United University, Miaoli 360301, Taiwan

Dr. Yu-Lun Tseng

Institute of Environmental Engineering, National Sun Yat-sen University, Kaohsiung 804201, Taiwan

### Deadline for manuscript submissions

15 December 2025

## About the Journal

### Message from the Editor-in-Chief

Environmental issues are quickly becoming central political, economic and academic topics of the twenty-first century. A large number of modern challenges are directly or indirectly caused by complex interactions between environmental issues. Such issues require interdisciplinary research, knowledge and insights to understand and, ultimately, for solutions to be found. Through the journal *Environments*, we strive to create a platform for meaningful discourse by accepting contributions from a wide range of fields. We sincerely hope you will consider publishing your distinguished work in this highly-accessible, peer-reviewed journal.

---

### Editor-in-Chief

Prof. Dr. Sergio Ulgiati

1. Department of Science and Technology, Parthenope University of Naples, Centro Direzionale, Isola C4, 80143 Napoli, Italy

2. School of Environment, State Key Joint Laboratory of Environment Simulation and Pollution Control, Beijing Normal University, No. 19 Xijiekouwai Street, Beijing 100875, China

---

### Author Benefits

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), PubAg, AGRIS, GeoRef, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2025).
