

## Special Issue

# Environmental Risk Assessment of Aquatic Ecosystem

### Message from the Guest Editors

The Special Issue aims to gather the latest research, innovations, and advances in risk assessment in the aquatic environment. We welcome the submission of papers that attend to various topics of interest, including the field investigation of the occurrence and environmental behavior of pollutants in the aquatic environment, toxicokinetic and toxicology studies regarding contaminants on the aquatic species, and the potential ecological risk brought by the change in environmental factors. Additionally, submissions that consider the novel risk assessment method based on the existing database and environmental and economic impacts on the aquatic ecosystems are also welcomed. This Special Issue will provide valuable insights into the risk assessment of aquatic ecosystems, which is a critical environmental challenge many countries worldwide face. This Issue also matches well with the UNEP Sustainable Development Goal 3: Good health and well-being, 6: Clean water and sanitation, and 14: Life below water. We invite authors to submit contributions that will enhance our understanding of the current potential risks in aquatic ecosystems.

## About the Journal

### Message from the Editor-in-Chief

Environmental issues are quickly becoming central political, economic and academic topics of the twenty-first century. A large number of modern challenges are directly or indirectly caused by complex interactions between environmental issues. Such issues require interdisciplinary research, knowledge and insights to understand and, ultimately, for solutions to be found. Through the journal *Environments*, we strive to create a platform for meaningful discourse by accepting contributions from a wide range of fields. We sincerely hope you will consider publishing your distinguished work in this highly-accessible, peer-reviewed journal.

### Author Benefits

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), PubAg, AGRIS, GeoRef, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2025).
