

## Special Issue

# Carbon Sequestration Potential of Urban Parks

### Message from the Guest Editors

In the context of the climate laws that are being approved all over the world, and with the aim of achieving carbon neutrality by the year 2050, municipalities must play an important political role in leading by example during this crucial process intent on the sustainable development of Earth. Due to urbanization, cities are under constant stress, and environmental sustainability is in constant danger. Sustainable urbanism practices, under the rules of green cities, must be developed and implemented. Urban parks are crucial for that purpose because among many ecosystem services, they allow for carbon sequestration in biomass and in soil, and thus may improve carbon neutrality. However, to improve carbon accountability, we need more scientific information about biomass and soil carbon sequestration. This Special Issue of *Environments* gathers a collection of scientific quantitative information surrounding the carbon sequestration of green urban practices, with specific focus being given to urban parks.

## About the Journal

### Message from the Editor-in-Chief

Environmental issues are quickly becoming central political, economic and academic topics of the twenty-first century. A large number of modern challenges are directly or indirectly caused by complex interactions between environmental issues. Such issues require interdisciplinary research, knowledge and insights to understand and, ultimately, for solutions to be found. Through the journal *Environments*, we strive to create a platform for meaningful discourse by accepting contributions from a wide range of fields. We sincerely hope you will consider publishing your distinguished work in this highly-accessible, peer-reviewed journal.

---

### Editor-in-Chief

Prof. Dr. Sergio Ulgiati

1. Department of Science and Technology, Parthenope University of Naples, Centro Direzionale, Isola C4, 80143 Napoli, Italy
2. School of Environment, State Key Joint Laboratory of Environment Simulation and Pollution Control, Beijing Normal University, No. 19 Xijiekouwai Street, Beijing 100875, China

### Author Benefits

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), PubAg, AGRIS, GeoRef, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2025).
