

Special Issue

Microbial Electrochemical Technologies for Resource-Efficient Waste Management

Message from the Guest Editor

Energy-efficient innovative technologies are essential for wastewater treatment and waste minimization. There is a growing need for resource recovery for sustainable management of natural sources. Among the many solutions, microbial electrochemical systems provide unique opportunities for recovering these valuable sources while contributing environmental protection. Highlights of the topics included in this special issue are, but not limited to:

- Wastewater treatment in microbial electrochemical technologies (microbial fuel cells, microbial electrolysis cells, microbial desalination, capacitive deionization, and MXCs)
- Integrated microbial electrochemical technologies for energy and resource recovery
- Critical assessment, evaluation and reviews on the future of various bioelectrochemical principles, technologies and applications
- Non-conventional and industrial wastewater treatment such as oil and gas produced waters
- Theoretic development and modelling/simulation studies and process optimization
- Materials, design configurations, scale-up and applications (recovery of valuable chemicals and metals) of MXCs

Guest Editor

Dr. Veera Gnanaswar Gude

Civil and Environmental Engineering Department, Mississippi State University, Mississippi State, MS 39762, USA

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Environmental issues are quickly becoming central political, economic and academic topics of the twenty-first century. A large number of modern challenges are directly or indirectly caused by complex interactions between environmental issues. Such issues require interdisciplinary research, knowledge and insights to understand and, ultimately, for solutions to be found. Through the journal *Environments*, we strive to create a platform for meaningful discourse by accepting contributions from a wide range of fields. We sincerely hope you will consider publishing your distinguished work in this highly-accessible, peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Sergio Ulgiati

1. Department of Science and Technology, Parthenope University of Naples, Centro Direzionale, Isola C4, 80143 Napoli, Italy

2. School of Environment, State Key Joint Laboratory of Environment Simulation and Pollution Control, Beijing Normal University, No. 19 Xijiekouwai Street, Beijing 100875, China

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubAg, AGRIS, GeoRef, and other databases.

Journal Rank:

JCR - Q2 (Environmental Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2025).
