

Special Issue

Plastic Contamination: Challenges and Solutions Volume II

Message from the Guest Editors

Either in larger or smaller sizes, known as microplastics and nanoplastics, plastics are continuously released to the environment, where they accumulate due to their resistance to degradation. The accumulation of plastics in the environment can have negative effects on organisms and ecosystems directly through toxicity, or indirectly through habitat changes.

This Special Issue invites novel contributions in the form of critical reviews and research papers to address all aspects of plastics, such as (i) strategies or technologies to improve the production, use, and waste management of plastics; (ii) analytical methods for the assessment of micro/nanoplastics; (iii) concentrations and characteristics of micro/nanoplastics in the environment; (iv) ecotoxicological or abiotic effects of micro/nanoplastics; and (v) the role of micro/nanoplastics as vectors of contaminants and pathogens. This Special Issue also welcomes contributions regarding changes in plastics policies, consumption, incorrect disposal, and waste management during the COVID-19 pandemic.

About the Journal

Message from the Editor-in-Chief

Environmental issues are quickly becoming central political, economic and academic topics of the twenty-first century. A large number of modern challenges are directly or indirectly caused by complex interactions between environmental issues. Such issues require interdisciplinary research, knowledge and insights to understand and, ultimately, for solutions to be found. Through the journal *Environments*, we strive to create a platform for meaningful discourse by accepting contributions from a wide range of fields. We sincerely hope you will consider publishing your distinguished work in this highly-accessible, peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Sergio Ulgiati

1. Department of Science and Technology, Parthenope University of Naples, Centro Direzionale, Isola C4, 80143 Napoli, Italy

2. School of Environment, State Key Joint Laboratory of Environment Simulation and Pollution Control, Beijing Normal University, No. 19 Xijiekouwai Street, Beijing 100875, China

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubAg, AGRIS, GeoRef, and other databases.

Journal Rank:

JCR - Q2 (Environmental Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2025).
