

Special Issue

Rural-Urban Relations and Sustainable Food Systems

Message from the Guest Editors

Whether the climate change, energy crisis, or economic downturn, we are aware that the food system will confront many challenges. The recent pandemic has shown the necessity to test novel approaches. This means its resilience must increase, while at the same time its capacity must be enhanced. The relation between the city and the countryside has also come to the fore, alongside multiple benefits that could potentially arise out of the enhancement of such relations. In this Special Issue, food systems are used as an organizing framework, as they represent the ideal locus to think of urban and rural as two closely interconnected dimensions. Looking at the ecological, social, economic, technical, and institutional components of the food systems and their interactions and outcomes, the “boundaries” between rural and urban become blurred. Our focus is on the sustainability-related aspects that relate the various components and outcomes of the food system to their rural-urban context. We invite papers presenting original research on this topic, to contribute to the identification of best practices and potential solutions to present and future challenges.

About the Journal

Message from the Editor-in-Chief

Environmental issues are quickly becoming central political, economic and academic topics of the twenty-first century. A large number of modern challenges are directly or indirectly caused by complex interactions between environmental issues. Such issues require interdisciplinary research, knowledge and insights to understand and, ultimately, for solutions to be found. Through the journal *Environments*, we strive to create a platform for meaningful discourse by accepting contributions from a wide range of fields. We sincerely hope you will consider publishing your distinguished work in this highly-accessible, peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Sergio Ulgiati

1. Department of Science and Technology, Parthenope University of Naples, Centro Direzionale, Isola C4, 80143 Napoli, Italy

2. School of Environment, State Key Joint Laboratory of Environment Simulation and Pollution Control, Beijing Normal University, No. 19 Xijiekouwai Street, Beijing 100875, China

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubAg, AGRIS, GeoRef, and other databases.

Journal Rank:

JCR - Q2 (Environmental Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2025).
