

Special Issue

Wastewater and Solid Waste Treatment

Message from the Guest Editor

Fast-growing industrialization and urbanization have dramatically increased energy demand and the discharge of nutrients. With an increasing shortage of energy resources and concerns of environmental pollution, energy-efficient and sustainable pollution control is critical for the optimization of wastewater treatment plants (WWTPs). The main current challenges of WWTPs which drive innovation in the wastewater industry include nutrients and biosolids management as well as energy optimization. Co-digestion of organic-rich wastes with municipal sludge is a promising energy recovery technology to increase specific methane production per unit of influent solids significantly. This Special Issue invites original research papers and critical reviews with an emphasis on the following topics: (i) advances in biological nutrient removal technology; (ii) modeling and optimization of BNR processes; (iii) co-digestion technology; and (iv) development of technology for energy-neutrality in WWTPs.

About the Journal

Message from the Editor-in-Chief

Environmental issues are quickly becoming central political, economic and academic topics of the twenty-first century. A large number of modern challenges are directly or indirectly caused by complex interactions between environmental issues. Such issues require interdisciplinary research, knowledge and insights to understand and, ultimately, for solutions to be found. Through the journal *Environments*, we strive to create a platform for meaningful discourse by accepting contributions from a wide range of fields. We sincerely hope you will consider publishing your distinguished work in this highly-accessible, peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Sergio Ulgiati

1. Department of Science and Technology, Parthenope University of Naples, Centro Direzionale, Isola C4, 80143 Napoli, Italy
2. School of Environment, State Key Joint Laboratory of Environment Simulation and Pollution Control, Beijing Normal University, No. 19 Xijiekouwai Street, Beijing 100875, China

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubAg, AGRIS, GeoRef, and other databases.

Journal Rank:

JCR - Q2 (Environmental Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2025).
