

## Special Issue

# Impacts of Agricultural Land Use Changes on Environments

### Message from the Guest Editor

In order to promote a deeper understanding of the impacts various land use changes and agricultural practices have on environmental systems, *Environments* is launching a Special Issue entitled “Impacts of Land Use Changes on Agricultural Environments”. Articles related, but not limited, to innovative or significant findings in: agricultural land use change studies; agricultural land use and water quality or quantity; the impacts of agricultural land use on ecosystem services; agricultural land use planning and modeling; agricultural land use management; and teleconnection of agricultural land use changes across various scales would be appropriate. Of course, studies on other related topics are welcome as long as they provide novel insights with the aim to investigate the issues or provide pertinent solutions for the negative effects that agricultural land use changes have on the environment.

## About the Journal

### Message from the Editor-in-Chief

Environmental issues are quickly becoming central political, economic and academic topics of the twenty-first century. A large number of modern challenges are directly or indirectly caused by complex interactions between environmental issues. Such issues require interdisciplinary research, knowledge and insights to understand and, ultimately, for solutions to be found. Through the journal *Environments*, we strive to create a platform for meaningful discourse by accepting contributions from a wide range of fields. We sincerely hope you will consider publishing your distinguished work in this highly-accessible, peer-reviewed journal.

### Author Benefits

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), PubAg, AGRIS, GeoRef, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2025).
