

Special Issue

Epidemiology of Violence, Substance Use, and Mental Health Problems

Message from the Guest Editors

Research on mental health, substance use, and violence continues to expand. Since the onset of the COVID-19 pandemic, there has been extensive discussion about mental-health issues impacting all aspects of health and wellbeing. Despite the deluge of studies, much remains to be investigated regarding the changing trends and epidemiology of violence, substance use, and mental-health problems before and after the acute phase of the pandemic. Such knowledge will consider the changing social, political, cultural, economic, and demographic determinants of population mental health before and during the era of COVID-19. These insights are sorely needed to ensure safer societies and guide public health and clinical interventions on mental health and substance-use problems. Such guidance has the potential to inspire policy initiatives and acceleration of action to halt the rising rates of violence, suicide, addiction, and psychiatric illnesses. With this Special Issue, I hope to encourage discussion of the knowledge gaps, epidemiology, and determinants of addiction, violence, and mental illnesses specially before, during, and after the acute phase of the COVID-19 pandemic.

About the Journal

Message from the Editor-in-Chief

Epidemiologia is an international, peerreviewed, open access, multidisciplinary journal that focuses on the latest outstanding research in epidemiology. Researchers in academic and clinical settings as well as health professionals are encouraged to publish research articles, short communications, and review articles. We welcome the broad research community with expertise in epidemiology to contribute to the development of this platform, with the shared goal of accelerating the advancement of scientific knowledge in the field all over the world.

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, PMC, PubMed, FSTA, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.9 days after submission; acceptance to publication is undertaken in 6.7 days (median values for papers published in this journal in the second half of 2025).
