

# Special Issue

## Features Papers in *Epigenomes* 2025

### Message from the Guest Editors

This Special Issue aims to collect high-quality papers in the epigenetics and epigenomics research fields. We encourage researchers from various fields within the journal's scope to contribute papers highlighting the latest developments in their research field or to invite relevant experts and colleagues to do so. The topics of this Special Issue include, but are not limited to, the following:

- Functional epigenomic studies;
- Genome-wide epigenetic status and regulation of cells or tissues;
- Chromatin modifications and remodeling in diseases;
- Epigenetics in physical diseases;
- Environmental changes in the epigenetic status of cells or tissues;
- Inheritance or fixation of epigenetic characteristics;
- Description of novel methods to study epigenetic regulation;
- Novel tools, protocols, and technologies for epigenetic studies and therapeutics;
- Long noncoding RNA (LncRNA), microRNA (miR), and chromatin crosstalk.

## About the Journal

### Message from the Editor-in-Chief

In the past years the growth of the epigenetic field has been outstanding, from here the need of a journal where to centralize all new information on the subject. The term epigenetics is now broadly used to indicate changes in gene functions that do not depend on changes in the sequence of DNA. *Epigenomes* covers all areas of DNA modification from single cell level to multicellular organism as well as the epigenetics on human pathologies and behavior.

*Epigenomes* (ISSN 2075-4655) is a fully peer-reviewed publication outlet with a rapid and economical route to open access publication. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

---

### Editor-in-Chief

Prof. Dr. Ernesto Guccione

Icahn School of Medicine at Mount Sinai, Hess Center for Science and Medicine, New York, NY 10029, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), PMC, PubMed, Embase, PubAg, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Biochemistry, Genetics and Molecular Biology (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25.5 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the second half of 2025).
