Deadline for manuscript submissions:

closed (31 January 2023)

Message from the Guest Editors

We invite submissions to a Special Issue of *Fermentation* journal on the topic "Biomass Waste as a Renewable Source of Biogas Production". The Special Issue addresses challenges and opportunities for using both biomass and waste to enhance biogas quantity and quality.

Carbon-neutral-based energy consumption is an essential for maintaining a sustainable and eco-friendly social infrasystem. Renewable energy is gaining attention as part of alternative energy sources to achieve successful carbon neutrality. Of particular significance, biogas produced from biomass and waste is the most future-oriented renewable energy source. Based on this necessity, the development of biomass and waste to biogas technologies should be further accelerated for a successful access to make biogas valuable. This Special Issue aims to collect articles that will contribute to an enhancement of biogas production from biomass or waste and provide a proper direction that biogasification technique will have to approach.

an Open Access Journal by MDPI

Coruña, Spain

Message from the Editor-in-Chief

Welcome to an open access journal, *Fermentation*, which meets the growing need for a high quality peer-reviewed international journal with easy access to all researchers globally. We hope that you will share our enthusiasm for this journal and look forward to working with you to make *Fermentation* a leader in its field. Your contributions are vital for the success of this journal. Proposals for editing a special issue for a particular topical area are always welcome.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Biotechnology and Applied Microbiology) / CiteScore - Q1 (Plant Science)
