Message from the Guest Editor

Both beer and distilled beverages are characterised by the presence of alcohol, which is always derived by means of fermentation. In order to produce the vast variety of quality beers and distilled beverages, a very large array of fermentative organisms is utilised, either as pure cultures or mixed cultures. On the one hand the fermentation can be managed through careful selection of suitable strains, while on the other hand the fermentation can be managed through providing the most suitable conditions under which the fermentation can be carried out.

This Special Issue of Fermentation aims to disseminate recent innovative research regarding all aspects of fermentation as it applies to the brewing and distilling industries, as well as authoritative reviews that compile information from previously published material.

Utilization Research, USDA-ARS,
Peoria, IL, USA

Message from the Editor-in-Chief

Welcome to a new open access journal, Fermentation, which meets the growing need for a high quality peerreviewed international journal with easy access to all researchers globally. We hope that you will share our enthusiasm for this new journal and look forward to working with you to make Fermentation a leader in its field. Your contributions are vital for the success of this new journal. The publication fees are therefore fully waived for papers submitted in 2018. Proposals for editing a special issue for a particular topical area are always welcome.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: Indexed in the Emerging Sources Citation Index (ESCI) - Web of Science, BIOSIS Previews, Scopus (Elsevier), Inspec (IET) and Chemical Abstracts/SciFinder (CAS).

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the first half of 2019).
