Lactic Acid Fermentation and the Colours of Biotechnology

Message from the Guest Editor

The heterogeneous class of lactic acid bacteria (LAB) have represented a continuous reservoir of biotechnological productions for millennia. In the light of recent innovative applications for lactic acid fermentations in the different biotechnological sectors and industries (e.g., food production, agricultural and environmental practices, industrial processes, medical and pharmaceutical solutions), this Special Issue will encompass multiple aspects of LAB-based innovations from the biological understanding (e.g., genomics, proteomics, metabolomics and systems biology; bioinformatics; microbial physiology and metabolism) to the biotechnological development (e.g., strain improvement; bioprocess and metabolic engineering; applied genetics and molecular biotechnology), including aspects dealing with industrialization (e.g., scale up of fermentation processes; downstream processing of fermentation products; bioreactor design; monitoring, biosensors and instrumentation; biosafety and biosecurity).

Message from the Editor-in-Chief

Welcome to a new open access journal, Fermentation, which meets the growing need for a high quality peerreviewed international journal with easy access to all researchers globally. We hope that you will share our enthusiasm for this new journal and look forward to working with you to make Fermentation a leader in its field. Your contributions are vital for the success of this new journal. The publication fees are therefore fully waived for papers submitted in 2018. Proposals for editing a special issue for a particular topical area are always welcome.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High visibility: Indexed in BIOSIS Previews (Web of Science), Scopus (Elsevier), Inspec (IET) and Chemical Abstracts/SciFinder (CAS).
Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the second half of 2018).
