

Special Issue

Advances in Fermented Fruits and Vegetables

Message from the Guest Editor

This Special Issue is focused on recent advances in fermented fruits and vegetables and aims to highlight the latest research in this field. Fermented fruits and vegetables have been consumed for centuries and are an essential part of many traditional diets worldwide. In recent years, there has been a growing interest in the health benefits of fermented fruits and vegetables, as well as their potential uses in the food industry.

We invite researchers, scientists, and practitioners to submit their original research articles, reviews, and communications related to fermented fruits and vegetables for consideration in this Special Issue. Topics of interest include the microbial diversity of fermented foods, the impact of fermentation on the nutritional value of fruits and vegetables, and the technological advances in their production. We will also explore the potential health benefits of fermented fruits and vegetables, including their role in promoting gut health and preventing chronic diseases such as cancer and diabetes.

Guest Editor

About the Journal

Message from the Editor-in-Chief

Welcome to a new open access journal, Fermentation, which meets the growing need for a high quality peerreviewed international journal with easy access to all researchers globally. We hope that you will share our enthusiasm for this new journal and look forward to working with you to make Fermentation a leader in its field. Your contributions are vital for the success of this new journal. Proposals for editing a special issue for a particular topical area are always welcome.

Editor-in-Chief

Prof. Dr. Christian Kennes
Department of Chemical Engineering, Faculty of Sciences, University of
La Coruña, La Coruña, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, Inspec, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biotechnology and Applied Microbiology) /
CiteScore - Q1 (Plant Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.5 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the first half of 2025).
