Advances in Fermented Foods and Beverages

Message from the Guest Editor

Fermented foods and beverages have been integral to the human diet since the dawn of civilization. In this Special Issue, we invite researchers to contribute to enhancing the existing literature with original research and review articles on the following topics:

Investigations of the historical significance of fermentation;
Characterizations of microbial and enzymatic processes;
The exploration of factors contributing to consumer preferences for traditional and health-conscious food products;
The development of new fermented beverages or foods;
Fermentation of by-products derived from food processing industries;
The identification and characterization of bioactive compounds released during fermentation process.
