

## Special Issue

# Research Progress of Rumen Fermentation

### Message from the Guest Editor

Ruminant nutrition is a constant challenge due to several factors, including climate change, which has interfered with the production of quality feed, and the large fluctuation in the price of raw materials used in ruminant feed, which has led nutritionists to seek additives and co-products to reduce costs and maintain productivity. Unlike non-ruminants, which have well-established diets, ruminants generally consume a wide variety of feeds, mainly related to the availability of the region or country. The main factor responsible for this adaptive issue to food is the rumen, a fermentation chamber that, through the action of microorganisms, sequences the digestion process of ruminants. Much research has currently explored animal nutrition as a way to mitigate methane emissions, with emphasis on additives that can modulate the microbiota, reducing, for example, the population of methanogenic bacteria. Understanding the potential of ruminal fermentation of additives, cereals, forages and co-products is necessary and will be the focus of this special edition.

### Guest Editor

Prof. Dr. Aleksandro S. Da Silva

Departamento de Zootecnia, Universidade do Estado de Santa Catarina (UDESC), Chapecó 89815-630, Brazil

### Deadline for manuscript submissions

15 September 2025

## About the Journal

### Message from the Editor-in-Chief

Welcome to a new open access journal, Fermentation, which meets the growing need for a high quality peerreviewed international journal with easy access to all researchers globally. We hope that you will share our enthusiasm for this new journal and look forward to working with you to make Fermentation a leader in its field. Your contributions are vital for the success of this new journal. Proposals for editing a special issue for a particular topical area are always welcome.

---

### Editor-in-Chief

Dr. Badal C. Saha  
Retired, National Center for Agricultural Utilization Research, USDA-  
ARS, Peoria, IL, USA

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Biotechnology and Applied Microbiology) /  
CiteScore - Q1 (Plant Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.5 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the first half of 2025).
